Technical drawing of a rectangular frame with dimensions and hatching. The overall width is 120 and the overall height is 240. The frame consists of a central white rectangle and four hatched corner pieces. The top and bottom hatched pieces have a width of 17. The left and right hatched pieces have a height of 15. The central white rectangle has a width of 86 (120 - 17 - 17) and a height of 190 (240 - 15 - 15). A vertical line is drawn in the center of the white rectangle, extending from the bottom hatched piece to the top hatched piece. This line is divided into two segments: a lower segment of 110 and an upper segment of 130. Dashed lines connect the corners of the central white rectangle to the corners of the top and bottom hatched pieces, forming an 'X' shape. The dimensions are labeled as follows: 17 (top-left hatched piece width), 120 (total width), 15 (top-right hatched piece height), 10 (top white rectangle height), 253 (total height), 243 (total height minus top hatched piece), 17 (bottom-left hatched piece width), 17 (bottom-right hatched piece width), 17 (bottom hatched piece width), 60 (bottom white rectangle width), 60 (bottom white rectangle width), 110 (lower segment of vertical line), 130 (upper segment of vertical line), 240 (total height), 15 (bottom-right hatched piece height), 10 (bottom white rectangle height), and 25 (bottom white rectangle height).

[illegible]

Technical drawing of a modular shelving unit. The unit is composed of several vertical sections. The leftmost section is 1.8m high and 35cm wide, containing a potted plant. The middle section is 1.8m high and 35cm wide, containing a glass. The rightmost section is 1.8m high and 35cm wide, containing a small table. The unit is illuminated by LED track lighting, with labels 'LED traka' pointing to the lighting strips. Dimensions are provided for the overall unit (1.8m x 56.5m) and individual sections (1.8m x 35cm). The drawing also shows the internal structure and the placement of the LED tracks.
